Welnamis System

The Welnamis experience provides the key benefits of mindfulness, meditation and deep-relaxation techniques. Special music, which is applied through gentle acoustic waves with binaural sounds, effects a completely new anti-stress-experience during a 30 or 60 minute sound therapy treatment. The technique the therapy is based on is the Quantum-Harmonic-Sound Therapy.

Additional to our classic programs, you can choose between our four new programs with specific brain wave frequencies :

- **Stress Relief** is recommended for first-time users and fosters a deeply relaxed yet present state of mind.
- **Mindfulness** activates creativity, insight, dreams, and light sleep, often associated with REM sleep.
- **PowerNap** fosters a deep regenerative state associated with deep sleep which is the most restorative part of a person's sleep cycle.
- **Awareness** is the most innovative of the group and provides conditions for increased perception, learning, and problem solving – as well fast and efficient thinking.

Certifications according to ISO13485:

CE marked
Made in Germany
TÜV certification
